

A FREE CASH FLOW FOCUSED GOLD PRODUCER

First Quarter 2023 Financial Results

May 2023

Cautionary Notes

Cautionary Note Regarding Forward-Looking Statements

Except for statements of historical fact relating to the Company, certain statements contained in this presentation constitute forward-looking information, future oriented financial information, or financial outlooks (collectively “forward-looking information”) within the meaning of applicable securities laws. Forward-looking information may be contained in this document and the Company’s other public filings. Forward-looking information relates to statements concerning the Company’s outlook and anticipated events or results and in some cases, can be identified by terminology such as “may”, “will”, “could”, “should”, “expect”, “plan”, “anticipate”, “believe”, “intend”, “estimate”, “projects”, “predict”, “potential”, “continue” or other similar expressions concerning matters that are not historical facts.

Forward-looking information and statements in this presentation are based on certain key expectations and assumptions made by the Company. Although the Company believes that the expectations and assumptions on which such forward-looking information and statements are based are reasonable, undue reliance should not be placed on the forward-looking information and statements because the Company can give no assurance that they will prove to be correct. Forward-looking information and statements are subject to various risks and uncertainties which could cause actual results and experience to differ materially from the anticipated results or expectations expressed in this presentation. The key risks and uncertainties include, but are not limited to: local and global political and economic conditions; governmental and regulatory requirements and actions by governmental authorities, including changes in government policy, government ownership requirements, changes in environmental, tax and other laws or regulations and the interpretation thereof; developments with respect to COVID-19 pandemic, including the duration, severity and scope of the pandemic and potential impacts on mining operations; and other risk factors detailed from time to time in the Company’s reports filed with the Securities and Exchange Commission on EDGAR and the Canadian securities regulatory authorities on SEDAR.

Forward-looking information and statements in this presentation include statements concerning, among other things: forecasts; outlook; timing of production; production, cost, operating and capital expenditure guidance; the Company’s intention to return excess attributable free cash flow to shareholders; the timing and implementation of the Company’s dividend policy; the implementation of any share buyback program and the amount thereof; statements regarding plans or expectations for the declaration of future dividends and the amount thereof; future cash costs and all in sustaining costs (“AISC”) per ounce of gold, silver and other metals sold; the prices of gold, silver and other metals; Mineral Resources, Mineral Reserves, realization of Mineral Reserves, and the existence or realization of Mineral Resource estimates; the Company’s ability to discover new areas of mineralization; the timing and extent of capital investment at the Company’s operations; the timing and extent of capitalized stripping at the Company’s operations; the timing of production and production levels and the results of the Company’s exploration and development programs; current financial resources being sufficient to carry out plans, commitments and business requirements for the next twelve months; movements in commodity prices not impacting the value of any financial instruments; estimated production rates for gold, silver and other metals produced by the Company; the estimated cost of sustaining capital; availability of sufficient financing; receipt of regulatory approvals; the timing of studies, announcements, and analysis; the timing of construction and development of proposed mines and process facilities; ongoing or future development plans and capital replacement; estimates of expected or anticipated economic returns from the Company’s mining projects, including future sales of metals, concentrate or other products produced by the Company and the timing thereof; the Company’s plans and expectations for its properties and operations; the impact of any suspension on operations; and all other timing, exploration, development, operational, financial, budgetary, economic, legal, social, environmental, regulatory, and political matters that may influence or be influenced by future events or conditions.

Such forward-looking information and statements are based on a number of material factors and assumptions, including, but not limited in any manner to, those disclosed in any other of the Company’s filings on EDGAR and SEDAR, and include: the inherent speculative nature of exploration results; the ability to explore; communications with local stakeholders; maintaining community and governmental relations; status of negotiations and potential transactions, including joint ventures; weather conditions at the Company’s operations; commodity prices; the ultimate determination of and realization of Mineral Reserves; existence or realization of Mineral Resources; the development approach; availability and receipt of required approvals, titles, licenses and permits; sufficient working capital to develop and operate the mines and implement development plans; access to adequate services and supplies; foreign currency exchange rates; interest rates; access to capital markets and associated cost of funds; availability of a qualified work force; ability to negotiate, finalize, and execute relevant agreements; lack of social opposition to the Company’s mines or facilities; lack of legal challenges with respect to the Company’s properties; the timing and amount of future production; the ability to meet production, cost, and capital expenditure targets; timing and ability to produce studies and analyses; capital and operating expenditures; economic conditions; availability of sufficient financing; the ultimate ability to mine, process, and sell mineral products on economically favorable terms; and any and all other timing, exploration, development, operational, financial, budgetary, economic, legal, social, geopolitical, regulatory and political factors that may influence future events or conditions. While the Company consider these factors and assumptions to be reasonable based on information currently available to the Company, they may prove to be incorrect.

The above list is not exhaustive of the factors that may affect any of the Company’s forward-looking statements and information. You should not place undue reliance on forward-looking information and statements. Forward-looking information and statements are only predictions based on the Company’s current expectations and the Company’s projections about future events. Actual results may vary from such forward-looking information for a variety of reasons including, but not limited to, risks and uncertainties disclosed in the Company’s filings on the Company’s website at www.ssrmining.com, on EDGAR at www.sec.gov, on SEDAR at www.sedar.com, and on the ASX at www.asx.com.au and other unforeseen events or circumstances. Other than as required by law, the Company does not intend, and undertake no obligation to update any forward-looking information to reflect, among other things, new information or future events.

All references to “\$” in this presentation are to U.S. dollars unless otherwise stated.

Qualified Persons

The scientific and technical information concerning our mineral projects in this presentation have been reviewed and approved by a “qualified person” under subpart 1 of Regulation S-K 1300 (“S-K 1300”). For details on the “qualified persons” approving such information, a description of the key assumptions, parameters and methods used to estimate mineral reserves and mineral resources included in this presentation, as well as data verification procedures and a general discussion of the extent to which the estimates may be affected by any known environmental, permitting, legal, title, taxation, sociopolitical, marketing or other relevant factors, please review the Technical Report Summaries for each of the Company’s material properties which are available under the Company’s corporate profile on EDGAR at www.sec.gov. 2022 Mineral Reserves and Mineral Resources were determined in accordance with Regulation S-K. Reserves and resources for prior periods were determined in accordance with Canadian National Instrument 43-101 – Standards of Disclosure for Mineral Projects (“NI 43-101”). Both sets of reporting standards have similar goals in terms of conveying an appropriate level of confidence in the disclosures being reported, but the standards embody slightly different approaches and definitions.

Cautionary Note Regarding Mineral Reserves and Mineral Resources Estimates

This presentation includes terms that comply with reporting standards in Canada under NI 43-101, including the terms “Mineral Reserves” and “Mineral Resources”, in addition to terms that comply with reporting standards in the United States under S-K 1300. NI 43-101 is a rule developed by the Canadian Securities Administrators that establishes standards for all public disclosure an issuer makes of scientific and technical information concerning mineral projects. The standards of NI 43-101 differ significantly from the requirements of the SEC. Accordingly, information concerning mineral deposits set forth herein may not be comparable with information made in accordance with U.S. standards.

Cautionary Note Regarding Non-GAAP Measures

This presentation includes certain non-GAAP terms or performance measures commonly used in the mining industry, including free cash flow, cash costs and AISC per ounce of gold and silver sold, realized metal prices, earnings before interest, taxes, depreciation and amortization (“EBITDA”), adjusted attributable net income, adjusted basic attributable net income per share, consolidated cash and consolidated net cash. Non-GAAP measures do not have any standardized meaning prescribed and, therefore, they may not be comparable to similar measures employed by other companies. The Company believe that, in addition to conventional measures prepared in accordance with GAAP, certain investors use this information to evaluate the Company’s performance. The data presented is intended to provide additional information and should not be considered in isolation or as a substitute for measures of performance prepared in accordance with GAAP. Readers should refer to the endnotes in this presentation for further information regarding how the Company calculates certain of these measures. Readers should also refer to the Company’s form 10-K and 10-Q filings available under the Company’s corporate profile on EDGAR at www.sec.gov or on the Company’s website at www.ssrmining.com, under the heading “Non-GAAP Financial Measures” for a more detailed discussion of how the Company calculates such measures and a reconciliation of certain measures to GAAP terms. See Endnote (5) for additional details.

Diversified Portfolio of High Quality, Long-Life Assets

Stable Operating Platform Targeting 700+ koz AuEq Annually

High Quality Diversified Portfolio

Stable production platform targeting 700+ koz AuEq

- Four core operating jurisdictions
- 8+ Moz AuEq in attributable Mineral Reserves
- 16+ year weighted average mine life

Organic Growth Potential

High return, low capital intensity near-term growth

- Çakmaktepe Extension first production in 2023: 1.2+ Moz Au production over LOM
- C2 (Çöpler Expansion) PFS expected in 2023, including maiden Mineral Reserves
- 20+ near-mine and stand-alone exploration targets adjacent to existing operations

Balance Sheet Strength

Robust balance sheet to organically fund growth

- Total cash of \$596M, net cash of \$312M *
- In 2022, reinvested proceeds from non-core asset sales into acquisitions in core jurisdictions
- Strong balance sheet supports near-term capital commitments and growth projects

Free Cash Flow Leader

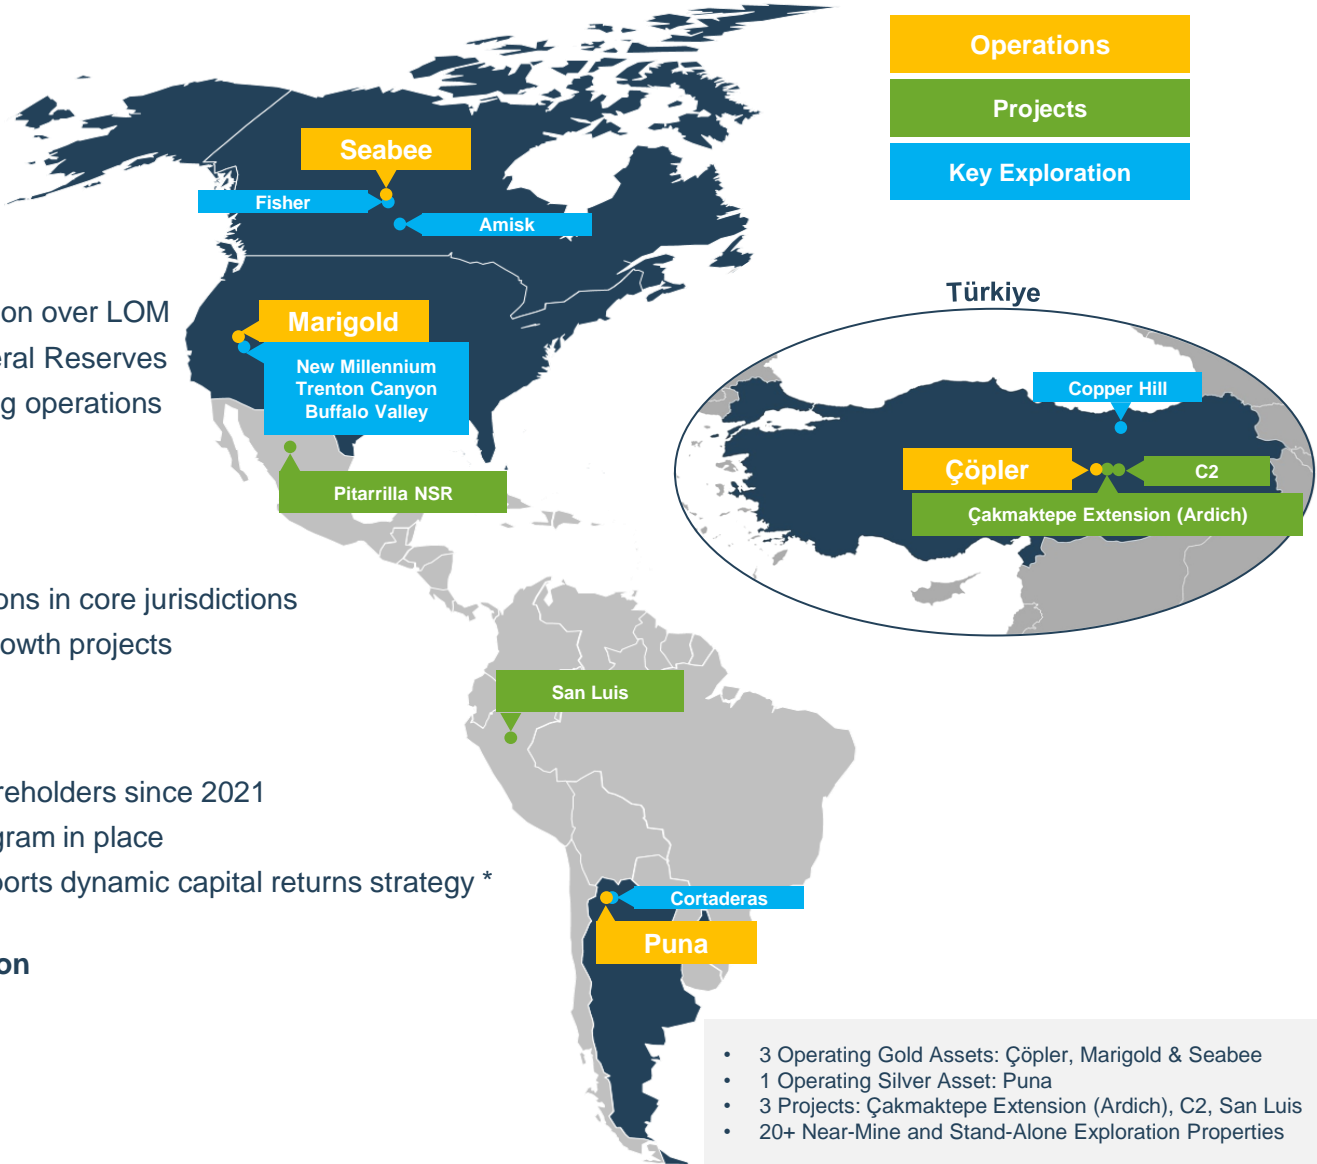

Free cash flow generation reflected in strong capital returns

- \$397M or approximately 14% of market capitalization returned to shareholders since 2021
- Year-to-date capital returns totalling \$47M; active share buyback program in place
- Low capital intensity growth enables strong FCF projections and supports dynamic capital returns strategy *

Track Record of Delivery

Disciplined leadership with established track record of value creation

- Continued operational delivery and ESG leadership
- Track record of accretive M&A and project delivery
- Diverse mining and processing skill set
- Focused on continuous improvement initiatives in 2023

Our Sustainability Vision: Living Our Values

Continuously Striving to Improve Performance in Focus Areas

Responsible Environmental Stewards

- Developed a global water strategy in 2022; 2023 focused on implementing water management plans at each of our sites
- Committed to net zero operational greenhouse emissions by 2050
- Integrated mine closure plans at all operations help to ensure a positive and lasting legacy for the local communities

Engage & Invest in Local Communities

- Over \$2.5 million in community investment in 2022, including economic development and scholarships
- Dedicated Social Development Funds at both Puna and Çöpler operations
- Çöpler Stakeholder Engagement Program, includes quarterly presentations and regular meetings with unions and local representatives

Proactive Approach to Health & Safety

- Site-specific initiatives and on-site health campaigns aimed at improving overall employee well-being
- Implemented a focused Leadership in the Field initiative designed to facilitate quality workplace health and safety conversations
- Improved Critical Risk management systems at sites to minimize potential risks

Commitment to Diversity & Inclusion

- Committed to CEO in Action initiative focused on advancing diversity & inclusion within the workplace
- Member of the Catalyst Accord 2022 and the 30% Club Canada aimed at accelerating advancement of women in the workplace
- Committed to establishing diversity initiatives, programs and targets across SSR Mining

Diversified Portfolio with +16 Year Weighted Average Mine Life

Long-term Stable Production Platform With Additional Avenues for Growth

Building on Proven History of Project Delivery and M&A

Non-Core Asset Sale Proceeds Redeployed in Core Jurisdictions

Delivering Projects On Time & Budget

POX Plant (Çöpler)

Initial Capex Budget Final Capex Spend

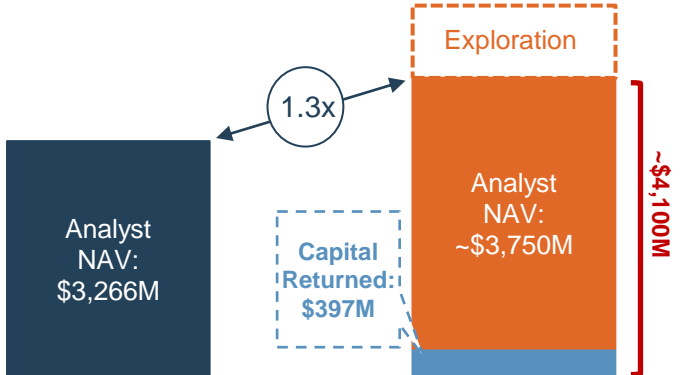

Chinchillas Project (Puna)

Initial Capex Budget Final Capex Spend

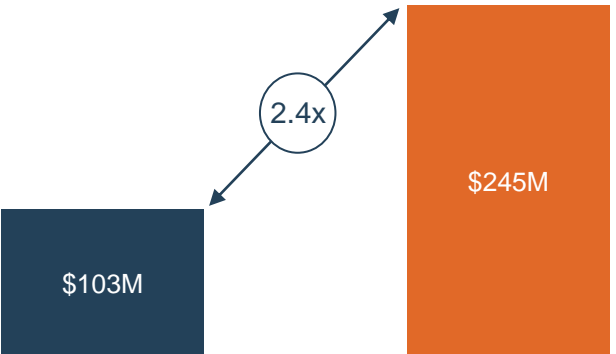

Building Value Through Disciplined M&A *

Track Record of Returning Capital to Shareholders

Peer Leading Returns Aligned With Robust Free Cash Flow Outlook

- Highlights

 - Building on two consecutive years of significant shareholder returns in the form of dividends and share repurchases
 - Total capital returns yields averaged approximately 5.0% in 2021 and 2022
 - Since the beginning of 2021, over \$280 million in shares repurchased at an average price of \$16.50 per share
 - Continue to return capital to shareholders through a combination of dividends and share repurchases
 - Minimum 2023 capital returns yield of 3.1% *
 - In 2023, completed share repurchases totaling \$32.3 million at an average price of \$15.06 per share
 - 2022 share buyback program authorizes repurchase of up to 10.6 million shares until June 2023

Q1 2023 Commentary

On Track for 2023 Consolidated Production and Cost Guidance

Operational	<p>First Quarter Production and Capital Spend in Line With Guidance</p> <ul style="list-style-type: none"> Q1 consolidated production of 147 koz AuEq at Cost of sales of \$1,289/oz and AISC * of \$1,693/oz AuEq As guided, first quarter expected to represent the lowest quarter of production and the highest AISC in 2023 Costs in Q1 reflect the expected increased sustaining capital spend associated with the Seabee winter road and haul truck purchases at Marigold On track for full year consolidated guidance of 700 – 780 koz AuEq at Cost of sales of \$1,055 – \$1,115/oz and AISC of \$1,365 – \$1,425/oz
Financial	<p>Continued Commitment to Capital Returns</p> <ul style="list-style-type: none"> Q1 attributable net income of \$29.8 million, or \$0.14/share diluted, and adj. attributable net income of \$21.3 million, \$0.10/share diluted * Q1 operating cash flow before working capital adjustments of \$90.9 million; operating cash flow of \$3.0 million * Q1 free cash flow before working capital adjustments of \$31.6 million; negative free cash flow of \$56.3 million * Closed the quarter with total cash of \$595.8 million, net cash of \$312.4 million and nearly \$900 million in liquidity * YTD capital returns of \$46.7 million including \$14.4 million in dividends in Q1 and \$32.3 million in share repurchases under NCIB
Growth	<p>Advancing Near-Mine Exploration and Resource Development Programs</p> <ul style="list-style-type: none"> Çakmaktepe Extension on-track for first production in 2023; C2 expansion project at Çöpler advancing to PFS in 2023 Positive exploration results from 2022 drill program at Puna announced in Q1 2023 Continued focus on accelerating Mineral Resource conversion across global portfolio

Q1 2023 Commentary

Operating Performance Aligned With Expectations

Financial Highlights			
		Q1 2023	Q1 2022
Gold Equivalent Production	oz	146,894	173,675
Gold Sales	oz	126,111	157,179
Silver Sales	Moz	2.4	1.8
Total Gold Equivalent Sales	oz	154,557	179,692
Revenue	\$M	\$314.6	\$355.4
Net Income	\$M	\$29.0	\$76.1
Attributable Net Income	\$M	\$29.8	\$67.6
Attributable Earnings Per Share (Basic / Diluted)	\$/sh	\$0.14 / \$0.14	\$0.32 / \$0.31

Significant Financial Strength

Robust Balance Sheet; Three Pillar Capital Allocation Framework

Financial Position *	
Market Capitalization	\$2.9B
Total Cash	\$596M
Total Debt	\$283M
Net Cash (Debt)	\$312M
Total Liquidity	\$896M

Debt	Face Value	Maturity	Interest Rate
Term Loan	\$53M	2023	LIBOR + 3.50% - 3.70%
Convertible Notes	\$230M	2033	2.50%
Credit Facility (\$200M capacity + \$100M accordion)	\$0M	2025	LIBOR + 2.00% - 3.00%

Capital Allocation Priorities
Low Capital Intensity Growth
<ul style="list-style-type: none"> 2023 exploration budget of \$94 million, up +50% y/y; includes \$81 million to advance growth and resource development exploration opportunities First production from Çakmaktepe Extension expected within 2023; expected to contribute +1.2Moz to Çöpler life of mine plan PFS for high-return C2 project expected in 2023
Balance Sheet Strength
<ul style="list-style-type: none"> Term loan scheduled quarterly repayments completed by end of 2023 Strong net cash position ensures SSR Mining’s resilience through future gold price cycles; Exited Q1 2023 with total liquidity of approximately \$900 million * Balance sheet supports capital commitments and dynamic shareholder returns strategy over long-term
Peer Leading Capital Returns
<ul style="list-style-type: none"> \$397 million in total capital returned to shareholders since 2021, including over \$280 million in share repurchases and \$117 million in dividends; average capital returns yield of approximately 5.0% in 2021 and 2022 Active NCIB program with over \$32 million repurchased in 2023 YTD; additional 2.4 million shares in available capacity under existing NCIB program

ASSET OVERVIEWS

Çöpler: Flagship Asset with a 21+ Year Mine Life

Çakmaktepe Extension First Production Expected Within 2023

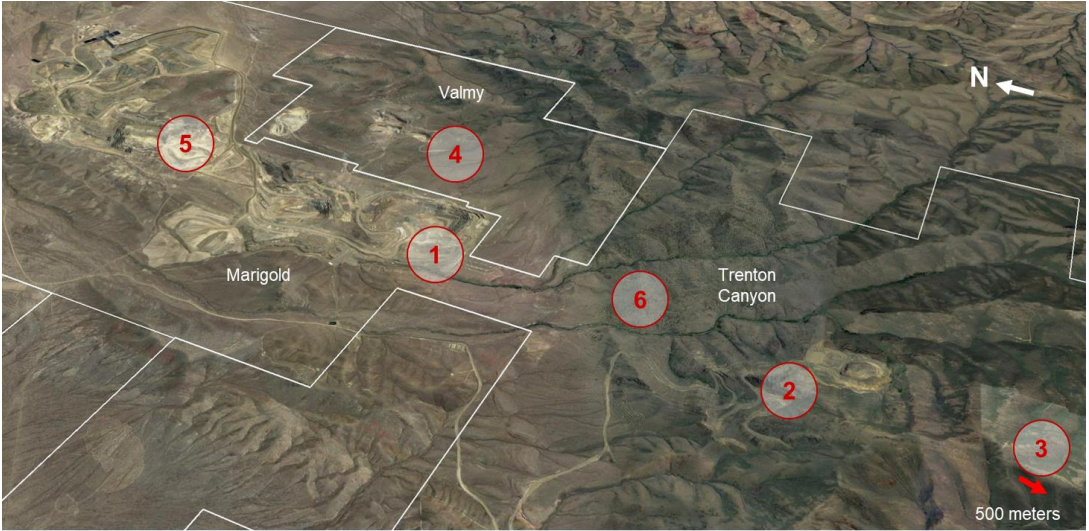

Location: Türkiye	Mining: Open Pit	Stage: Production
Land: ~26,000 ha	Processing: Heap leach, POX	Ownership: 80%
Q1 2023 Highlights		
<ul style="list-style-type: none"> Q1 gold production of 55.1 koz at Cost of sales of \$1,287/oz and AISC * of \$1,420/oz The Çakmaktepe Extension project initial waste stripping activity underway The sulfide plant delivered its second consecutive quarter at an average throughput rate of more than 8,000 tonnes per day Production profile remains approximately 55% weighted to H2 2023 		
2023 Priorities		
<ul style="list-style-type: none"> First production at Çakmaktepe Extension anticipated within 2023; expected to contribute over 1.2Moz of gold production to Çöpler life of mine plan Advance development of the C2 expansion project to pre-feasibility study level and publish maiden Mineral Reserves and updated Mineral Resources Near-mine exploration activity, complemented by regional work on the Kartaltepe licenses 		

Marigold: Large-Scale Open Pit in Nevada

Positioned for a Strong 2023

Location: USA	Mining: Open Pit	Stage: Production
Land: ~20,000 ha	Processing: ROM, Heap Leach	Ownership: 100%
Q1 2023 Highlights		
<ul style="list-style-type: none"> Q1 gold production of 52.0 koz at Cost of sales of \$1,063/oz and AISC * of \$1,663/oz Q1 AISC reflects the expected first half weighted sustaining capital spend, including \$29 million of Marigold's \$81 million 2023 sustaining capital budget spent in the quarter (partially associated with haul truck purchases) Continued to stack competent ore that is typical for the mine, helping support shorter leach cycles as compared to 2022 Production profile remains approximately 60 – 70% weighted to H2 2023 		
2023 Priorities		
<ul style="list-style-type: none"> Evaluate potential contributions from New Millennium for an improved and extended life of mine production profile Waste stripping activities at the Red Dot target in 2023 as part of optimization of Marigold's near- to medium-term production profile Evaluate potential longer-term pathways to production at the Trenton Canyon and Buffalo Valley targets 		

Marigold Exploration Targets			
			
1 New Millennium	2 Trenton Canyon	3 Buffalo Valley	4 Valmy
5 Mackay Pit	6 Deep Sulfide		
		Q1 2023 Actuals	2023 Guidance
Gold Production (koz)		52	260 — 290
Cost of sales (\$/oz)		\$1,063	\$1,000 — \$1,030
AISC (\$/oz) *		\$1,663	\$1,315 — \$1,365
Three-Year Guidance		2023E	2024E
Gold Production (koz)		260 — 290	215 — 245
			155 — 185

Seabee: High-Grade Underground in Canada

Expanded Exploration Program Focused on Extending Mine Life

Location: Canada	Mining: Underground	Stage: Production
Land: ~62,000 ha	Processing: Gravity concentration, cyanide leaching	Ownership: 100%

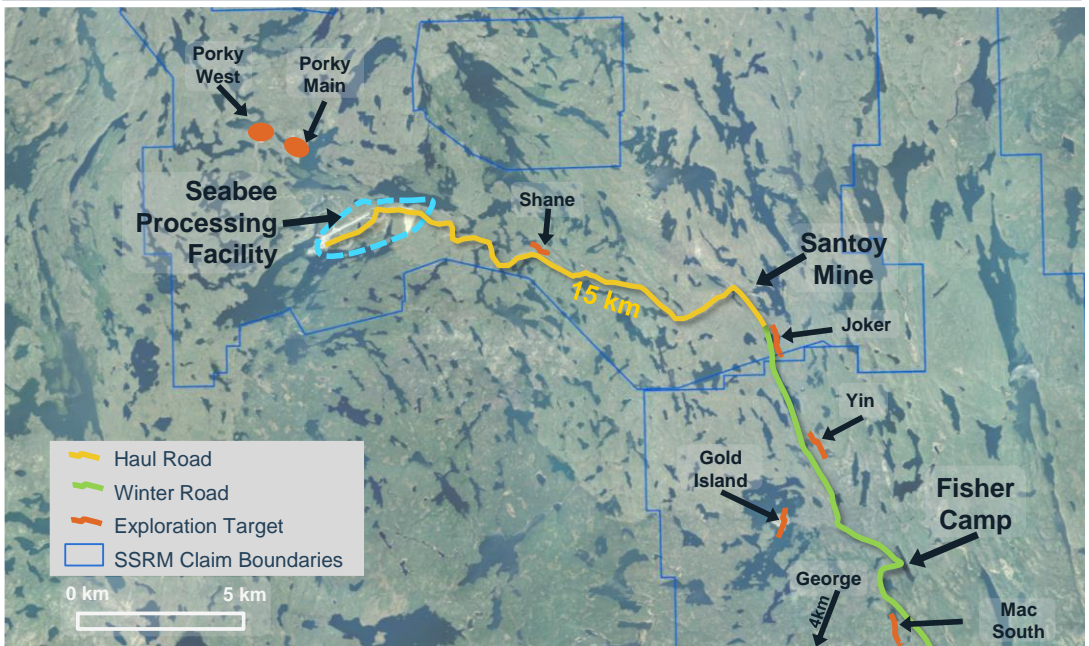

Q1 2023 Highlights

- Q1 gold production of 15.8 koz at Cost of sales of \$1,385/oz and AISC * of \$2,207/oz
- Plant throughput in Q1 averaged approximately 1,250 tonnes per day
- Processed grades in Q1 impacted by now-resolved equipment downtime that altered mine sequencing
- Production profile remains approximately 55% weighted to H2 2023; Capital spend remains first half weighted due to winter road deliveries

2023 Priorities

- Continuous improvement programs targeting full year underground production and plant throughput targets averaging above 1,250 tonnes per day in 2023
- Expanded exploration program focusing on continued delineation of additional Mineral Reserves and Mineral Resources near existing infrastructure at Santoy as well as drilling extension targets to evaluate potential future mining opportunities at depth
- Advance analysis of longer-term opportunities such as the Porky targets and further regional drilling for potential identification of long-term production pathways

Seabee Site Plan View

		Q1 2023 Actuals	2023 Guidance
Gold Production (koz)		16	100 — 110
Cost of Sales (\$/oz)		\$1,385	\$810 — \$840
AISC (\$/oz) *		\$2,207	\$1,160 — \$1,210
Three-Year Guidance	2023E	2024E	2025E
Gold Production (koz)	100 — 110	95 — 105	95 — 105

Puna: Large Open-Pit Silver Producer

Consistently Strong Operations; Near-mine Exploration Continuing

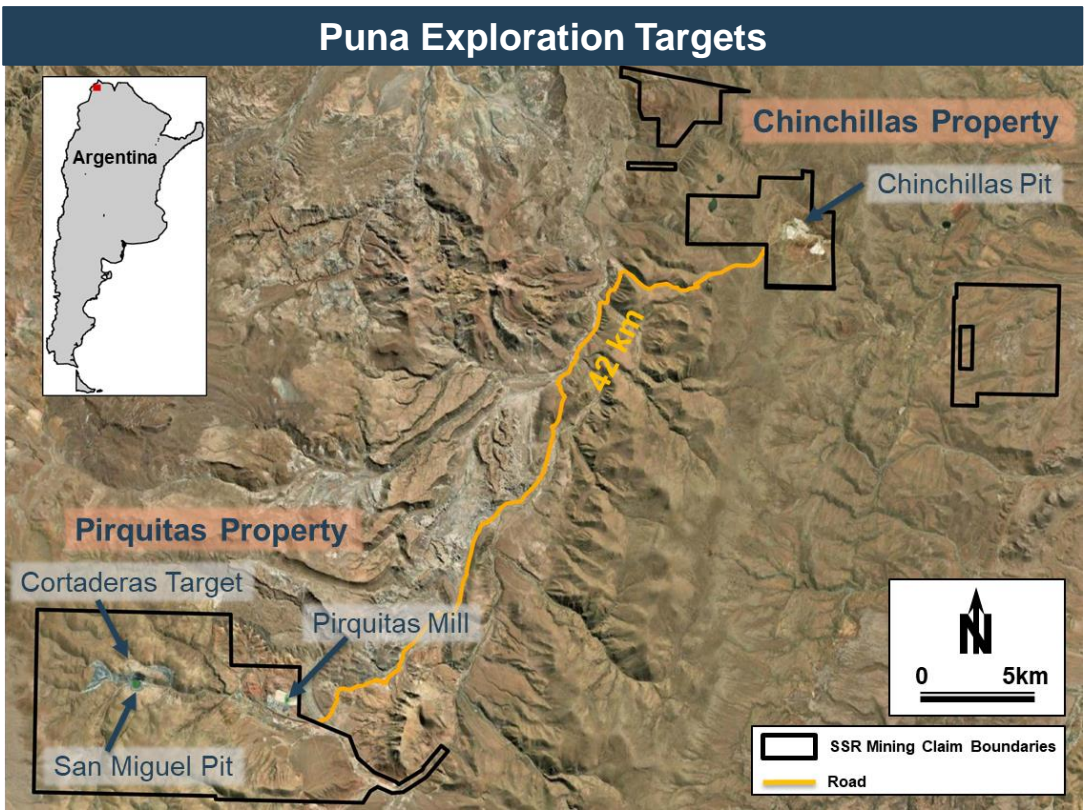

Location: Argentina	Mining: Open Pit	Stage: Production
Land: ~10,000 ha	Processing: Flotation	Ownership: 100%

Q1 2023 Highlights

- Q1 silver production of 2.0 Moz at Cost of sales of \$19.67/oz and AISC * of \$16.40/oz
- Throughput averaged more than 4,600 tonnes per day during the quarter; tonnes processed are targeted to remain at or above approximately 4,500 tonnes per day throughout the year
- In March 2023, released near-mine exploration results highlighting the potential Mineral Reserve and mine life growth at Puna; first exploration drilling completed at the property since 2016
- Production profile remains approximately 50 – 55% weighted to H2 2023

2023 Priorities

- Expanded exploration program with a continued focus on delineation of in-pit and near-mine targets with potential to add to existing Mineral Reserve life
- Refocused regional exploration targeting longer-term upside opportunities

		Q1 2023 Actuals	2023 Guidance
Silver Production (Moz)		2.0	8.0 — 9.0
Cost of Sales (\$/oz)		\$19.67	\$18.00 — \$19.50
AISC (\$/oz) *		\$16.40	\$16.25 — \$17.75
Three-Year Guidance		2023E	2024E
Silver Production (koz)		8.0 — 9.0	8.0 — 9.0
			2025E
			8.0 — 9.0

Control of the Entire Çöpler District

Recent Acquisition of an Additional 30% of Kartaltepe Delivers Significant Synergies

Çöpler District

Highlights

- Expands ownership of existing Mineral Reserves and Mineral Resources at the Çakmaktepe, Çakmaktepe Extension, and Bayramdere deposits
- Streamlines operating, financial and exploration activities across the Çöpler District while creating tangible synergies
- Eliminates incremental costs incurred through Anagold's purchase of Kartaltepe ore to account for differential ownership as had been previous practice **
- Increases ownership in regional tenements covering the Mavialtin porphyry belt, including the prospective Mavidere, Saridere, Aslantepe and Findiklidere targets
- Transaction completed in Q4 2022

Çakmaktepe Extension: First Production Expected in 2023

Potential for Further Mineral Resource Conversion and Growth

Highlights From Recent Exploration *

- 151 diamond drill holes since May 2021 Mineral Resource cut-off
 - 34 intervals were infill within the current Mineral Reserve pit,
 - 82 intervals targeted Mineral Reserve conversion within the existing Mineral Resource block model, and
 - 35 intervals were step-out intercepts outside of existing Mineral Resources
- Highlight intercepts from recent drilling include:
 - AR461: **8.23 g/t Au** over **28.3 m** from 138.0 m
 - AR514: 2.46 g/t Au over 53.0 m from 160.0 m
 - AR536: 2.38 g/t Au over 55.8 m from 110.6 m
 - AR544: **5.24 g/t Au** over **27.1 m** from 130.3 m
 - AR558: 5.20 g/t Au from over 27.6 m 149.1 m

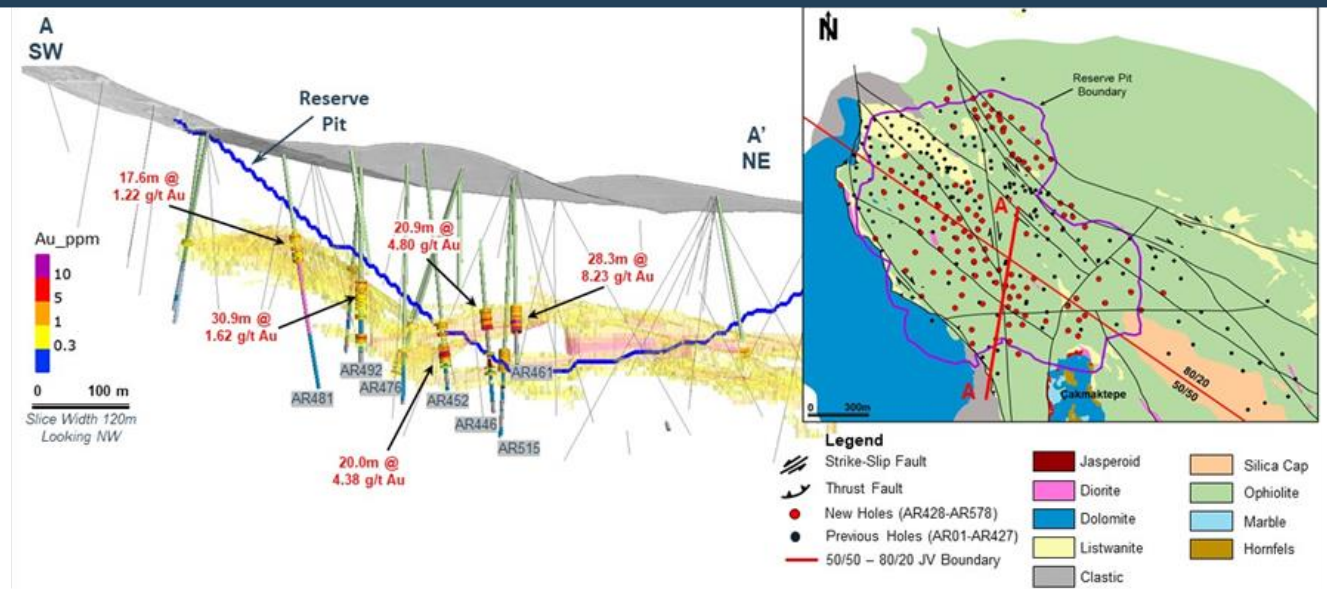

Mineral Reserve & Resource

- CDMP21 Reserve Case includes of 1.2Moz gold production from Çakmaktepe Extension beginning in 2023 including \$69M in total development capex
- 2021 initial Mineral Reserve included in CDMP21
 - 1.68Moz Au in Mineral Reserves
 - 606koz in M&I Mineral Resources
 - 844koz in Inferred Mineral Resources
- Mineralization at surface, target open to the southwest and at depth

Map of Cöpler Mine & Çakmaktepe Extension

Drill Hole Locations and Reserve Pit Boundary

Marigold: Creating Pathways for Mine Plan Enhancement and Extension

New Millennium Presents Opportunity for Mineral Resource Growth and Additional Mine Life

Overview of Marigold Property

Recent Exploration Highlights *

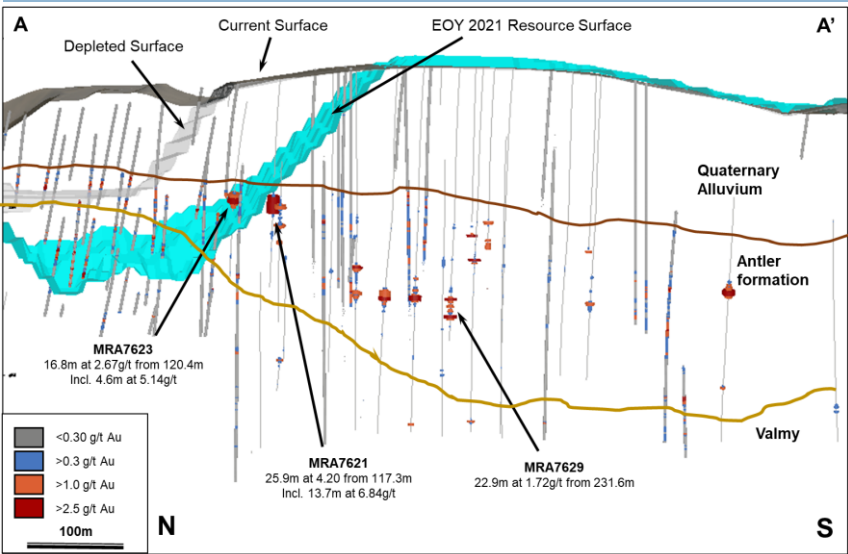

New Millennium

- Enabled by recent land acquisitions (Valmy, Section 6), **New Millennium** hosts potential as a larger, consolidated pit at Marigold
- Marigold currently hosts a mine life of +10 years, with current exploration focused on additional oxide ore that complements or extends the existing mine plan
- Recent New Millennium oxide results include:
 - 4.2 g/t over 25.9 m
 - 2.7 g/t over 16.8 m
 - 1.7 g/t over 22.9 m

Additional Oxide Mineralization Targets

- Potential longer-term production from Trenton Canyon & Buffalo Valley oxides
- Trenton Canyon and Buffalo Valley, located approximately four kilometers south and ten kilometers southwest of New Millennium
- Recent oxide drill results at Trenton Canyon include:
 - 11.1 g/t over 15.2 m
 - 5.5 g/t over 19.8 m
- Recent oxide drill results at Buffalo Valley include:
 - 6.2 g/t over 18.3 m
 - 1.4 g/t over 42.7 m

New Millennium N-S Section

Longer-dated Sulfide Mineralization Targets

- While exploration is focused on oxide inventory at Marigold, SSR Mining is simultaneously exploring for structurally controlled sulfide mineralization potential
- Recent sulfide drill results at Trenton Canyon include:
 - 25.6 g/t over 6.1 m
 - 2.6 g/t over 16.8 m
- Recent sulfide drill results at Spitfire target (2km NW of Buffalo Valley pit) include:
 - 20.1 g/t over 6.1 m
 - 2.0 g/t over 6.9 m

Seabee Exploration Program Focused on Mine Life Extension

Near-mine Resource Development Drilling Complemented By Regional Exploration Activity

Overview of Recent Seabee Exploration *

- Recent drilling focused on near-mine resource development adjacent to current underground infrastructure at the Santoy Mine Complex, as well as more regional activity across the Seabee property
- Results build upon, and are subsequent to, the Seabee 2021 Technical Report Summary
- A total of 377 diamond drill holes completed between September 2021 and November 2022

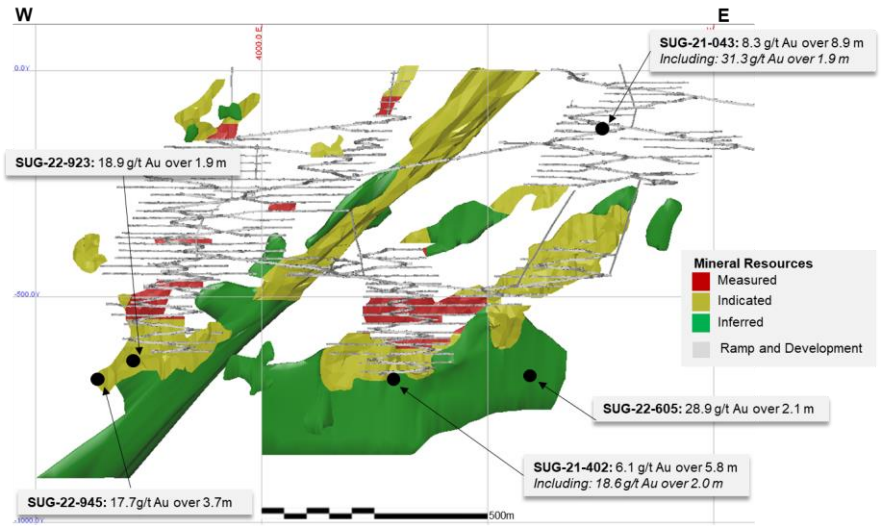

Santoy Mine Complex

- Santoy Mine Complex is the current source of production feed for Seabee processing plant; contributes the entirety of existing Seabee Mineral Reserves
- A total of 279 resource development drill holes were completed during the most recent exploration period
- Exploration activity aimed on extending existing mineralization, upgrade Mineral Resource to Mineral Reserves and providing greater confidence in currently defined Mineral Reserves
- Step-out drilling highlights from Santoy include:
 - 28.9 g/t over 2.1 m
 - 8.3 g/t over 8.9 m

Porky Main / Porky West

- Porky Main & Porky West targets are located ~4km north-northwest of Seabee processing facility
- Results to-date returning broad intercepts of near-surface mineralization potentially amenable to open pit mining in the future
- Highlight intercepts from Porky Main / Porky West include:
 - 1.9 g/t over 31.3 m
 - 1.3 g/t over 23.7 m

Santoy Mine Complex Longitudinal Section

Shane

- Shane represents the intersection of a number of historical zones of gold mineralization at various stages of exploration maturity
- Initial delineation of the Shane target; Remains open along strike
- Located adjacent to the Santoy Road that connects the mine to the Seabee processing facility
- Highlight intercepts include:
 - 54.3 g/t over 4.6 m

Puna: Near-Mine Exploration Success Presents Opportunity to Extend Mine Life *

Potential for Further Mineral Resource Conversion and Growth

Overview of Puna

- Puna is 100% owned by SSR Mining and is comprised of the Chinchillas and Pirquitas properties
- Located within the Bolivian tin-silver-zinc belt that extends from the San Rafael tin-copper deposit in southern Peru into the Puna region of Jujuy, Argentina
- Pirquitas mine and processing plant started in October 2006, and the Chinchillas mine declared commercial production in December 2018
- Chinchillas is an open pit silver-lead-zinc mine that provides all of the ore currently processed at the Pirquitas processing plant, located 42 km to the southwest
- Processing plant produces a silver-lead concentrate and a zinc concentrate that are shipped to international smelters
- Exploration drilling activity completed in 2022 could present a longer-term development pathway for further mine life extension

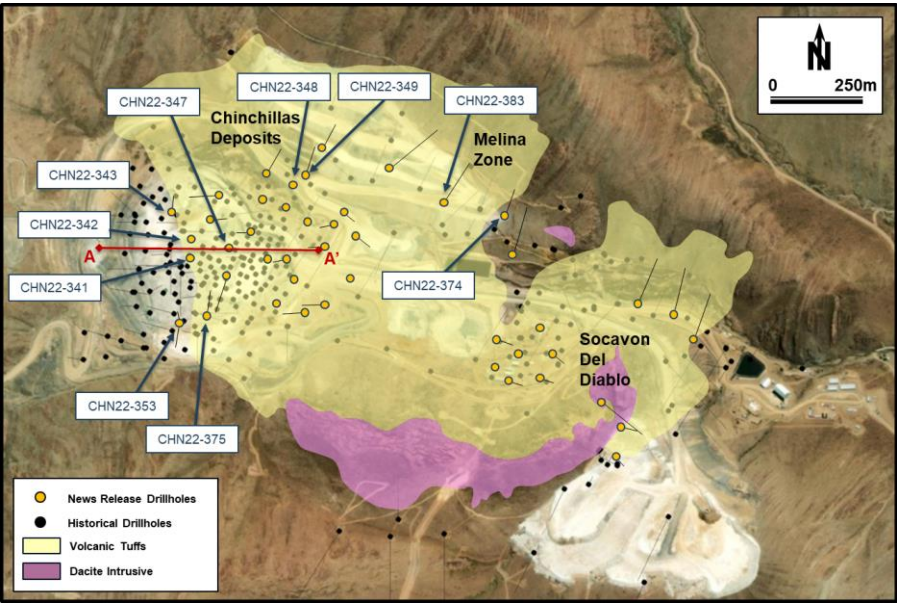

Overview of Recent Activity

- 48 drill holes between August 2022 and December 2022; first exploration drilling completed at Puna since 2016
- Chinchillas property: 46 holes focused on resource expansion, discovery & reconciliation drilling;
 - 27 of which targeted extensions of the Chinchillas mineralization to the east, northeast and at depth
- Pirquitas property: 2 step-out holes at the Cortaderas target show potential for a longer-term development pathway at Puna

Highlights From Recent Exploration

- CHN22-341: 65 m at 386 g/t Ag (**435 g/t AgEq**) from 53 m
 - Including: 27 m at 836 g/t Ag (913 g/t AgEq) from 73 m
- CHN22-374: 63 m at 219 g/t Ag (**451 g/t AgEq**) from 90 m
 - Including: 18 m at 382 g/t Ag (840 g/t AgEq) from 101 m
- CHN22-343: 31 m at 453 g/t Ag (**542 g/t AgEq**) from 25 m
- CHN22-347: 30 m at 422 g/t Ag (**479 g/t AgEq**) from 2 m
 - Including: 16 m at 699 g/t Ag (797 g/t AgEq) from 9 m

Plan View of Drilling at Chinchillas

Cross Section of Drilling at Chinchillas

Copper Hill: Greenfield Discovery

Near-surface Copper Sulfide Mineralization

Overview

- Located in the Black Sea region of northeast Türkiye; 70% owned by SSR Mining
- Drilling started in 2018, with 35 holes (~11,000 m) drilled to-date *
- Highlight intercepts include:
 - 3.29% Cu** over **37.4 m** from 92.0 m downhole
 - 3.03% Cu** over **31.5 m** from 107.5 m downhole
- Low levels of arsenic or other metals (<0.01% zinc and lead)
- Mineralization starts at surface, target open in all directions laterally and at depth

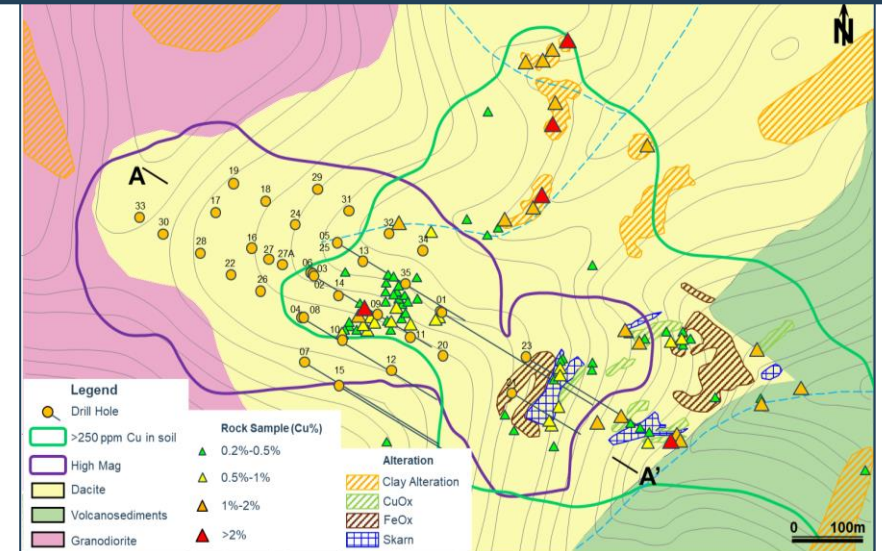

Copper Hill Property Location

2021 Exploration Drilling & Sampling

Endnotes

- 1) Mineral Reserves and Mineral Resources ("MRMR") for Çöpler, Marigold, Seabee, Puna, San Luis, Pitarrilla, and Amisk as of December 31, 2022. Mineral Reserves and Mineral Resources shown are SSR Mining ownership share only. SSR Mining owns 80% in both Anagold and Kartaltepe licenses. Mineral Resources are stated exclusive of Mineral Reserves. For details see our news release dated February 22, 2023 titled "SSR Mining Reports Fourth Quarter and Full Year 2022 Results," and Mineral Reserves and Mineral Resource summary tables included in Item 2 of our Annual Report on Form 10-K for the year ended December 31, 2022 ("Form 10-K"). For the Company filings, please see our website at www.ssrmining.com, on EDGAR at www.sec.gov, on SEDAR at www.sedar.com and on the ASX at www.asx.com.au.
- 2) Production platform statements and estimates are extracted from, or based on, Technical Report Summaries (TRS) prepared in compliance with subpart 1 of Regulation S-K 1300 for Çöpler, Marigold, Seabee and Puna. Please see our news release dated February 23, 2022 titled "SSR Mining Reports Fourth Quarter and Full Year 2021 Results" as well as our Current Report on Form 8-K filed with the SEC's EDGAR system on September 29, 2022. Each TRS was prepared by appropriate QPs. For the Company filings, please see our website at www.ssrmining.com, on EDGAR at www.sec.gov, on SEDAR at www.sedar.com, and on the ASX at www.asx.com.au. SSR Mining continues to advance exploration and resource development activities at each of its assets, and this data will be incorporated into MRMR statements as the accompanying technical work so dictates.
- 3) The Initial Assessment Case is preliminary in nature and includes an economic analysis that is based, in part, on Inferred Mineral Resources. Inferred Mineral Resources are considered too speculative geologically for the application of economic considerations that would allow them to be categorized as Mineral Reserves, and there is no certainty that the results will be realized. Mineral Resources that are not Mineral Reserves do not have demonstrated economic viability.
- 4) The Company reports Non-GAAP financial measures including adjusted attributable net income (loss), adjusted attributable net income (loss) per share, total debt, total cash, net debt (cash), total liquidity, adjusted EBITDA, cash generated by (used in) operating activities before changes in working capital, free cash flow (FCF), free cash flow before changes in working capital, cash costs and AISC per ounce sold to manage and evaluate its operating performance at its mines. Cash costs, AISC per ounce sold, adjusted attributable net income, cash generated by (used in) operating activities before changes in working capital, FCF, free cash flow before changes in working capital, total cash, total debt, net cash (debt) and total liquidity are Non-GAAP Measures with no standardized definition under U.S. GAAP. See "Cautionary Note Regarding Non-GAAP Financial Measures" and "Non-GAAP Reconciliations" in this presentation for additional details. See also the Company's 10-K, available on our website at www.ssrmining.com, on EDGAR at www.sec.gov, on SEDAR at www.sedar.com, and on the ASX at www.asx.com.au, for detailed definitions of these Non-GAAP measures.
- 5) Financial and operations amounts presented in this presentation may not add due to rounding.
- 6) Historical production is reported on a consolidated basis and is a combination of SSR Mining and Alacer Gold production figures. Actual reported gold-equivalent production compared against the mid-point of annual guidance. 2020 guidance reflects the revised guidance issued September 18, 2020. 2022 guidance reflects the revised guidance issued on November 8, 2022. Gold sales, silver sales and gold equivalent sales are on a 100% basis. Gold equivalent ounces are calculated using the silver ounces produced or sold multiplied by the ratio of the silver price to the gold price, using the average LBMA prices for the period. The Company does not include copper, lead, or zinc as they are considered by-products. Realized metal prices are a non-GAAP financial measure. Gold equivalent ounces sold may not add based on amounts presented due to rounding. Please see "Cautionary Note Regarding Non-GAAP Measures" in this presentation.
- 7) The 2019 convertible notes bear interest at 2.50% payable semi-annually and are convertible by holders into the Company's common shares, based on an initial conversion rate of 55.6750 common shares per \$1,000 principal amount. On or after April 1, 2023 the Company may redeem all or part of the notes for cash, but only if the last reported sale price of the Company's common shares exceeds 130% of the conversion price. On or after April 1, 2026, the Company may redeem the 2019 Notes, in whole or in part, for cash equal to 100% of the 2019 Notes to be redeemed, plus accrued and unpaid interest, if any, to, but excluding, the redemption date. Holders may require the Company to purchase all or a portion of their 2019 Notes on each of April 1, 2026, April 1, 2029, and April 1, 2034 for cash at a purchase price equal to 100% of the principal amount of the 2019 Notes to be purchased, plus accrued and unpaid interest, if any, to, but excluding, the purchase date.
- 8) SSR Mining 2022 sustainability report published April 14, 2023. The full report is available on our website at https://www.ssrmining.com/corporate_responsibility/
- 9) Initial capex spend for the Çöpler POX plant based on original estimate in the 2016 Çöpler technical report. Final capital spend based on actual reported capex by Alacer Gold. Initial capex for the Chinchillas project based on 2017 PFS study. Final capital based on actual reported capital spend by SSR Mining in Q4/19 MD&A.
- 10) Realized FCF is calculated as the free cash flow generated by each asset/company following the identified transaction's closing date to the end of March 31, 2023. Analyst estimated SSR Mining NAV as of April 28, 2023, asset level NAV as of March 24, 2023. Realized proceeds from non-core asset sales include \$100 million for the sale of SSR Mining's non-core royalty portfolio on July 29th, 2021, \$127 million for the sale of the Pitarrilla project on January 13th, 2022, and approximately \$19 million in proceeds from the sale of non-core equity positions from April 1, 2021 to April 30, 2022.
- 11) Share price data used in performance analysis, 2023 dividend yield, 2023 capital returns yield and market capitalization calculation sourced from Capital IQ as of April 28, 2023. Share price data used in 2022 capital returns yield as of December 31, 2022 and share price data used in 2021 capital returns yield as of December 31, 2021, both share price data sourced from Capital IQ.
- 12) Capital returns includes SSR Mining's quarterly cash dividend details as of March 31, 2023 and NCIB share repurchases as of April 30, 2023. SSR Mining announced a quarterly dividend of \$0.05/share, (see news release dated February 17, 2021) and subsequently increased the quarterly dividend to \$0.07/share (see news released dated January 31, 2022). Capital returns in 2021 calculation includes share repurchases pursuant to the 2021 NCIB totaling \$148 million and four quarterly dividend payments totaling \$43 million. Capital returns in 2022 calculation includes share repurchases pursuant to the 2022 NCIB within the 2022 calendar year totaling \$100 million and four quarterly dividend payments totaling \$59M. Capital returns in 2023 calculation includes the share repurchases pursuant to the 2022 NCIB within the 2023 calendar year totaling \$32 million and four projected quarterly dividend payments totaling \$57 million. "2021 NCIB" refers to the Normal Course Issuer Bid established April 21, 2021, which expired April 20, 2022. "2022 NCIB" refers to the Normal Course Issuer Bid established June 20, 2022, which expires June 19, 2023

Growth Capital Expenditures	\$M	40	—	2	—	—	42
Growth Exploration and Resource Development Expenditures ⁽¹⁷⁾	\$M	27	20	21	5	9	81
Total Growth Capital	\$M	67	20	23	5	9	123

¹³⁾ Figures may not add due to rounding. Figures are reported on a 100% basis. Çöpler is 80% owned by SSR Mining.

¹⁴⁾ Excludes depreciation, depletion, and amortization

¹⁵⁾ Excludes sustaining exploration and evaluation expenditures. Includes approximately \$9 million in lease payments at Çöpler. Includes \$19 million in underground mine development at Seabee.

¹⁶⁾ Çöpler, Marigold and Seabee costs per ounce based on gold ounces sold; Puna costs per ounce based on silver ounces sold. Gold equivalent ounces sold are used in the calculation for total costs per ounce.

¹⁷⁾ Growth exploration and resource development expenditures are shown on a 100% basis, of which SSR Mining attributable amount totals \$76 million

Operating Guidance (100% basis) ⁽¹⁸⁾	Çöpler	Marigold	Seabee	Puna	Total
	Gold Production (koz)	Gold Production (koz)	Gold Production (koz)	Silver Production (Moz)	Gold Equivalent Production (koz)
2023E	240 — 270	260 — 290	100 — 110	8.0 — 9.0	700 — 780
2024E	260 — 290	215 — 245	95 — 105	8.0 — 9.0	670 — 750
2025E	300 — 330	155 — 185	95 — 105	8.0 — 9.0	660 — 740

¹⁸⁾ Gold equivalent figures for operating guidance are based on a gold-to-silver ratio of 83:1 in 2023, 77:1 in 2024 and 76:1 in 2025
